IMELDA DAMAYANTI

+62 813-8594-4960 | imeldadamayantik@gmail.com | https://www.linkedin.com/in/imeldadamayanti/

A passionate Website and App Developer with modern, scalability, and scalable products. Ensure high-quality and responsive apps. Enjoys continuous learning, strong communication and adaptability skills.

Education

Telkom University - **Bandung** Sep 2022 – Mar 2026

Bachelor of Informatics

- **GPA**: 3.87/4.00
- **Publication**: Cigarette Detection in Social Media Videos Using YOLOv11, IEEE (2024/2025)
- **Achievements**:
  - 1st winner of Competition Informatics Festival and Competition, Udayana University (2024)
  - Top 10 in YESIST12 International Project Competition, IEEE (2024)
  - Top 100 in the AI for Impact APAC Hackathon 2025, Google Cloud and Hack2skill (2025)

Work Experiences

Apple Developer Academy – **Bali** Mar 2026 - Present

iOS Developer Learner

- Led end-to-end development of KIDA, a kids' animation app, from concept to product within a 2-week sprint.
- Designed and built 4+ iOS applications in Swift, each addressing a real-world problem identified through user research.
- Utilized AI tools throughout the development process to speed up prototyping and iterate faster on solutions.

PT Surya Toto TBK – **Tangerang** Apr 2025 - Aug 2025

PHP Full Stack Developer Intern

- Developed and maintained an internal HR web application used by 700+ employees.
- Collaborated with HR and IT teams to gather requirements, design solutions, and ensure smooth implementation.
- Assisted in troubleshooting, bug fixing, and optimizing system performance for employee-facing applications.

PT Smartfren Telecom Tbk - **Jakarta** Jun 2024 – Sep 2024

Finance System Analyst and Operational Support Intern

- Providing technical support to the operational team regarding the use of financial systems, including troubleshooting.
- Preparing reports on data processing results or system performance to be submitted to supervisors or relevant stakeholders.
- Utilizing tools such as HeidiSQL and SQLyog for financial data processing.

Artificial Intelligence Lab - **Bandung** May 2024 – June 2025

Laboratory Assistant

- Explored the principles of Image Processing and Natural Language Processing.
- Actively participated in a team project to design and develop an Exploration Data Website, integrating data visualization and machine learning capabilities with K-Nearest Neighbors (KNN) algorithm.
- Developed a content strategy to enhance the online presence and engagement of @ailabtelkom's Instagram account.

PT Asia E-Services – **Bogor** Sep 2021 - Jan 2022

WordPress Developer

- Plan, create, and design internet sites and web pages with Wordpress and Figma.
- Participated in weekly client meetings to discuss solutions and update project status.
- Collaborated with internal and external design resources to implement scalable front-end templates and design modules.

Projects

Various Data Analysis 🔗 Nov 2025

Personal Project

- Performed classification of Brassicaceae family plants using the KNN algorithm.
- Predicted CO values based on several related features using linear regression.
- Conducted classification on USPS handwriting data using a Deep Neural Network.

BookNest 🔗 Nov 2024

Fullstack

- BookNest is a web platform that allows users to rate and review books.
- Participate in discussion forums for book enthusiasts.
- Built using SpringBook for backend services and Bootstrap for responsive frontend design.

Certifications

- **Technical Skills**: MySQL, Python, HTML5, CSS, Bootstrap, PHP, Golang, Laravel, Git.
- **Certification:**
  - Coursera, Python for Data Science, AI & Development 🔗
  - Google Cloud, Prompt Design in Vertex AI 🔗
  - Google Cloud, Build Real World AI Applications with Gemini and Imagen 🔗
  - Dicoding, Start Program with Python 🔗
  - Dicoding, Learn Basic of AI 🔗
  - Dicoding, Learn Basic of Website Programming 🔗
